

REA OXY

2-in-1 Treatment

01

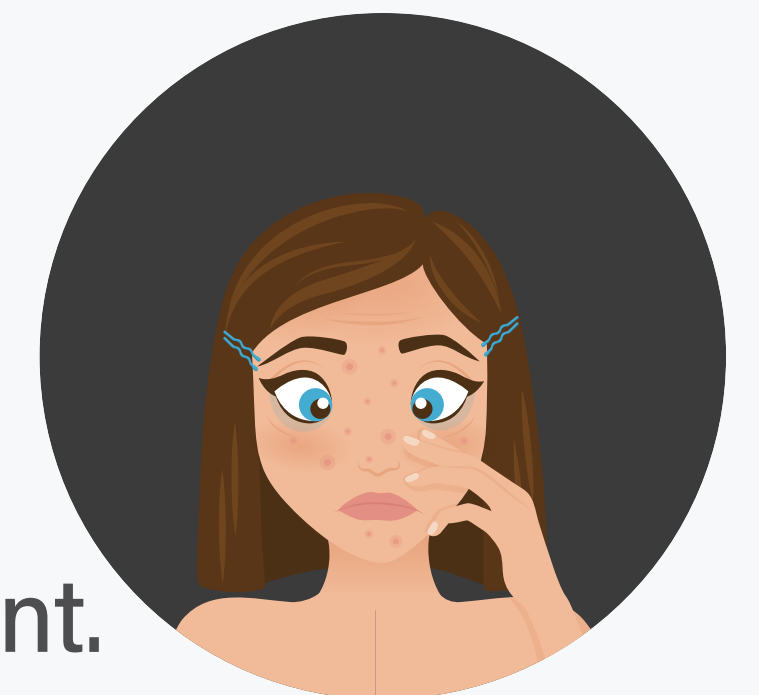

WHAT IS REA OXY FACIAL?

The **Rea Oxy Facial** redefines facial treatments by combining CO2 bubbles facial with advanced Radio Frequency (RF) Skin Tightening Technologies.

What SHOULD I EXPECT ?

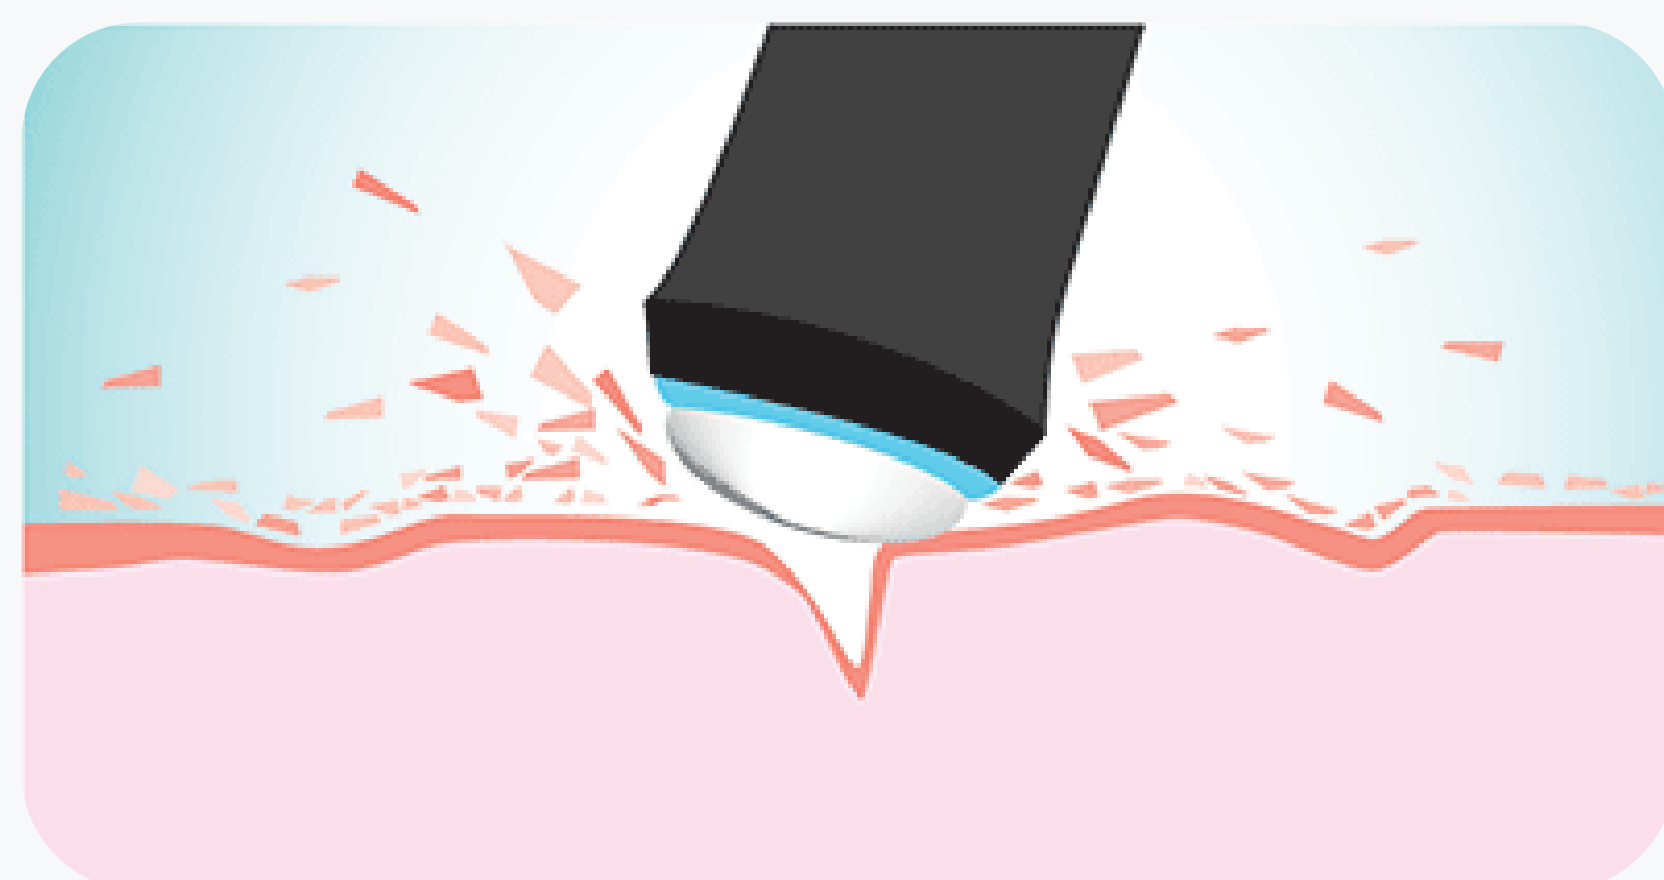

This exclusive combination provides:

- Visible results in just a single treatment.
- Oxygen generation from within.
- Improvement in fine lines and wrinkles.
- Firm and rejuvenate complexion.
- Overall improvement in skin tone and skin texture.

Rea Oxy is a facial treatment that helps to soften fine lines, reduces wrinkles, revitalizes dull complexions and provides an overall improvement in skin texture and skin tone.

Exfoliate: Capsugen is used to remove the upper skin layer dead cells, smoothen and renew the skin.

Oxygenate: CO2 bubbles that burst will trigger oxygen-rich blood to the area. This improves blood flow and skin metabolism.

Radio Frequency: Heats up the skin to stimulate new collagen and elastic fibers. Results in firmer, tighter skin.
